

AABHAS KUMAR

Full-Stack Developer (MERN) | B.Tech CSE, 2028

aabhas147@gmail.com | +91 93890 87240 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Backend-minded full-stack developer who ships complete MERN applications: data modeling, secure authentication, payments and cloud media delivery. Solid in DSA, OS and DBMS fundamentals, and comfortable debugging across the whole stack. Seeking a software development internship.

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), SQL, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT & HTTP-only cookie auth, bcrypt, MVC, Multer

Frontend: React.js, React Router, Context API, Tailwind CSS, Vite, responsive design

Databases & Services: MongoDB (aggregation, indexing), Mongoose, PostgreSQL, Cloudinary, Stripe API

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Tools: Git, GitHub, Postman, Linux shell, VS Code

PROJECTS

Vidyora: Full-Stack Video Streaming & Social Platform

[GitHub](#)

React 19, Vite, Node.js, Express 5, MongoDB, Mongoose, Cloudinary, JWT, Tailwind CSS

- Built a YouTube-style platform with video upload and search, likes, playlists, subscriptions, watch history and nested comment replies, served by 15+ REST endpoints.
- Secured authentication with bcrypt-hashed passwords and JWT in HTTP-only cookies; audited responses and removed a token leak from the login payload.
- Streamed multipart video and image uploads through Multer to Cloudinary and delivered media via its CDN; diagnosed an Axios Content-Type conflict that was blocking uploads.
- Wrote MongoDB aggregation pipelines and compound indexes for channel feeds, subscriptions and engagement data.
- Designed the frontend as Context, Hook and Component layers with a service layer as the single data-access boundary; migrated every feature from mock data to the live API.
- Fixed subtle bugs such as React Strict Mode double-counting video views (ref guard) and inconsistent channel IDs between slugs and MongoDB ownerIds.

MERN Grocery & E-Commerce Platform

[GitHub](#)

MongoDB, Express.js, React.js, Node.js, Stripe API, JWT, Tailwind CSS

- Built an end-to-end e-commerce platform with role-based access (Admin/Customer), cart synchronization and full order lifecycle management.
- Integrated Stripe payments with webhook listeners to confirm orders from asynchronous payment events.
- Modeled Mongoose schemas with pre-save validation hooks to keep inventory and order data consistent.
- Protected admin and customer routes with JWT stored in HTTP-only cookies.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad

Expected 2028

B.Tech, Computer Science & Engineering

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP

PROBLEM SOLVING

- Solved 70+ problems on [LeetCode](#) across arrays, two pointers, recursion and sorting.
